

NEW BRUNSWICK'S CLIMATE IS CHANGING.

Climate Change in New Brunswick means:

WARMING TEMPERATURES
Hot days and hot nights

DISEASE CARRIED BY ANIMALS

Ticks carrying Lyme disease

EXTREME WEATHER
Damaging floods, ice storms,
thunderstorms

REDUCED AIR QUALITY
Longer pollen seasons
Wildfire smoke

As a Health Professional, your trusted voice can start important conversations about climate change and health effects. Free tools and resources are available at nb.lung.ca/climate-change or see HPACC member _____
